TESTIMONIALS

Vadim Bulenok has been working on a project for our company for 5 months and the quality of his work has been exceptional. We had a requirement for our Content Management System to be upgraded to the latest programming technology. The new project was completely re-written in VB.NET to ensure maximum performance and scalability.

I would highly recommend Vadim to any other businesses who have a requirement for advanced level programming.

Marcus Green, [Toolkit Websites](#)

Vadim is a skilled *c#*.net developer but just as important he is also service minded, good at communicating, asks questions and makes suggestions. When working together from different locations these are the things that can make or break a project. I have hired Vadim to work on two projects and will be happy to hire him again.

Max Flodén, [XS Tech](#)

LANGUAGES

Russian (Fluent), Ukrainian (Fluent), English (Conversational)

HOBBIES

Self-development, health-improving practice, paintball

OBJECTIVE

Interested to be a Team Lead/Web Developer
